FATEMEH KASHFI

SENIOR FRONT END DEVELOPER

+90-5362598847 | kashfi.sf@gmail.com | Istanbul, Turkey

ABOUT ME

Senior Front-End Engineer with extensive experience architecting, building, and optimizing high-performance, scalable web applications using React, Next.js, TypeScript, and robust state/data management (Redux, React Query). Demonstrated track record of delivering mission-critical systems, including secure financial PWAs and high-traffic order management platforms across Fintech, Capital Markets, and the oil & petrochemical industries. Skilled in developing custom enterprise workflows, including specialized SharePoint ecosystems for prominent trading entities. Looking to bring technical depth and product-driven engineering to a Senior or Lead Front-End Developer role.

EDUCATION

Bachelor of Software engineering

University of Bu-Ali Sina
Hamedan
2016-2020

EXPERIENCE

Senior Front-End Developer

Hirbod Niroo (Oil, Gas & Petrochemical)

December 2025 until Present

- Architected a custom Window Management System hosting 30+ applications as draggable, resizable windows, with imperative drag performance, portal-aware overlay stacking, and CSS container-query layouts that adapt to window size rather than viewport.
- Led modularization of a legacy work desk into 12+ domain-scoped TypeScript modules with typed service layers, React Query data hooks, and a unified WMS shell enabling parallel delivery of meetings, personnel, tasks, permissions, and notifications on one platform.
- Built end-to-end meeting workflows, scheduling with location/participant conflict detection, location calendar timelines, Minutes-of-Meeting capture, and Excel export, backed by a Playwright E2E suite covering the full lifecycle across admin and participant roles.
- Delivered task management UX spanning Kanban, detail views, nested file explorer, work logs, and analytics reports, mapping board drag-and-drop to domain actions (approval, rejection, work logging) with role-based permission enforcement.
- Shipped a ref-counted SSE client with topic multiplexing and token-aware reconnect, wired to automatic React Query invalidation for live notifications and resource sync.

Front-End Developer

OmidBank (Fintech / Sub-bank of Bank Sepah)

December 2024 until December 2025

- Developed OmidBank's next-generation PWA using Material-UI, React Query, JSS, React Hook Form, and Yup, delivering a modern and responsive user experience.
- Implemented custom encryption and decryption interceptors for Axios, enhancing API security and ensuring user data protection.
- Developed essential banking features, including internal money transfers, cheques, loans, and guarantees, enabling seamless access to financial services.
- Enhanced credit card and wallet features, improving usability and financial management within the app.
- Continuously improved the main PWA application by adding new features, fixing bugs, and refactoring code, ensuring optimal performance.
- Managed and maintained in-app web views for the Android app, ensuring a seamless integration of web-based services.
- Developed features for the Admin Panel using Vue.js and led its refactoring to React, improving scalability and maintainability.

SKILLS

Frontend Development:

HTML / CSS | Bootstrap | Sass | JavaScript (ES6+) | ReactJS | jQuery | TailwindCSS | Shadcn/u | Material UI | Core UI | Zod | React hook form / Yup / Formik | TypeScript | Next.js | Vue.js

API & State Management:

Restful API / AJAX | Axios | React Query | Redux / Redux saga

Testing & Version Control:

Git | GitHub | scrum | Cypress | Playwright

UI/UX Design:

Adobe XD / Figma | Adobe Photoshop

Database Management:

Microsoft SQL Server | PostgreSQL

LANGUAGE

Persian

English

HOBBIES

game

design

movie

Front-End Developer

Datxsoft (Capital Markets / Pasargad Financial Group)

September 2021 until December 2024

- Developed and optimized the client-side of a high-traffic order management system, improving UI performance by 30% using React, TypeScript, and Redux.
- Enhanced user experience and streamlined workflows by integrating Material-UI and Ag-grid, leading to a 20% increase in task efficiency.
- Refactored and maintained legacy projects using ExtJs and AngularJS, ensuring cross-browser compatibility and reducing load time by 15%.
- Operated within an Agile development environment, actively participating in team planning, sprint reviews, and retrospectives to improve workflow efficiency and collaboration.
- **Concurrent Enterprise Project (Aseh Group):** Leveraged Microsoft SharePoint to customize and integrate front-end interfaces with legacy systems, optimizing content workflows by 25% and implementing intuitive React UIs for smart office solutions.

PROJECTS

Work Desk

Multi-Window Enterprise Workspace

Next.js App Router | TanStack Query | Shadcn/ui | Tailwind CSS | Playwright

A browser-based enterprise workspace unifying 30+ independent applications into a cohesive, desktop-like operating environment. Engineered a typed, modular shell featuring draggable and resizable windows, portal-aware stacking, and container-query layouts to modernize fragmented operational workflows.

Nirvana (OMS)

Capital markets platform

React | TypeScript | Redux Toolkit | Redux Saga | Material UI | AG Grid

Developed a comprehensive Order Management System (OMS) using React and TypeScript to streamline trading operations across multiple financial instruments. Integrated advanced features like Market Watch, Portfolio Management, OTC transactions, treemap visualization, and high-density data tables to process rapidly changing market datasets seamlessly.

Omid Bank

FinTech · Mobile Banking PWA

React | React Router | TanStack Query | Axios | Framer Motion

Architected and built a production-grade Mobile Banking PWA unifying core financial operations (wallets, transfers, loans, deposits) and civic services into a responsive mobile experience.
